Technological Trends

Digital Transformation

Digital technology is changing how businesses operate and deliver value

Hybrid Work

Work is no longer a place, creating an ever-changing perimeter

Cloud Migration

Infrastructure, applications, and data are moving to multi-cloud

IT Operations vs Security
No Single Source of Truth | Arbitrary Boundaries | Multiple Vendor Agents

The Approach Is Clearly Not Working

94%

of enterprises are missing up to **20%** of endpoints[1]

70%

of organizations have experienced breaches through unknown assets[2]

11

Every 11 seconds a ransomware attack occurs[3]

IT Operations + Security
Single Pane of Glass | Single Control Plane | Single Source of Truth

Converged Endpoint Management

Visibility | Control | Remediation

Tanium XEM Platform

IT operations, risk and compliance, and security

Real-time

Get high-fidelity data and respond in real time, not weeks or months

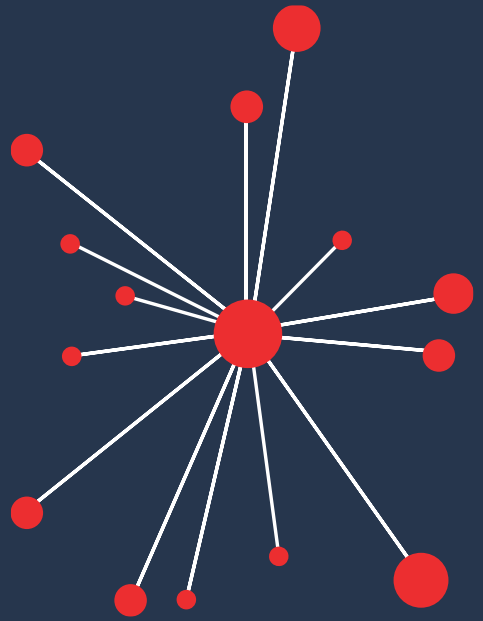
Cloud-delivered

Zero infrastructure, massive scale, delivered as a service

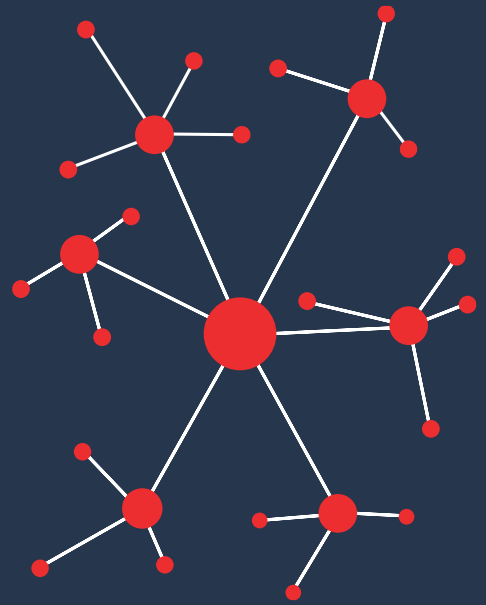
Automation

A single platform that enables automation via converged workflows

Traditional Endpoint Architectures Lead to Blind Spots and Delays



Centralized network



Distributed network

Decentralized Network: Game Changer

TANIUM

Patented linear chain architecture enables unparallel speed and exponential scale.

Visibility, control and remediation on any endpoint
Windows OS
Mac OS
OT/IoT
