Converged Endpoint Management (XEM)

Immer einen Schritt voraus: Proaktiv ist besser als reaktiv -

In Echtzeit alles sehen, steuern und beheben

Why is cybersecurity getting worse?

Breaches
still happen

11
Every 11 seconds a ransomware attack occurs

Isolated Point Solutions

What's required?
A convergence

IT Operations + Security

Single Pane of Glass | Single Control Plane | Single Source of Truth

Integrated cloud-based platform that locates all your data, patches every device in seconds, implements critical security controls and provides ongoing vigilance and compliance – all in real time, from a single pane of glass.

XEM

Converged Endpoint Management

Visibility
See every endpoint, everywhere.

Control
Manage every endpoint in real time.

Remediation
Investigate and respond to incidents in real time.

> **XEM effectively provides a single source of truth for an organization's entire endpoint estate, allowing for greater unification and coordination across teams to reduce risk. [...] Tanium's XEM solution also offers increased productivity and significant cost savings thanks to team collaboration and vendor consolidation.**

TANIUM™

- Majority of Fortune 100
- 5 Branches of the U.S. Armed Forces
- 8 of 10 Top U.S. Financial Institutions
- 7 of 10 Top Global Retailers
- 30+ Million Endpoints Managed Globally

20%
Unprotected, unmanaged endpoints discovered

5
Legacy tools replaced

38k
Missing patches fixed across thousands of endpoints

2
Hours to perform comprehensive vulnerability scans
6
Number of months it takes Tanium to pay for itself

Initial investment: $130,000
Estimated ROI: $1.75 million

TANIUM CASE STUDY

See how ABB Electrification's Tanium implementation helped them save time, gain visibility, boost patching rates and improve overall business efficiency.

Visibility, Control, and Remediation. One Agent.
