Sicherheit von morgen

The Perfect Storm of Complexity and Threats

**Data
Explosion**

180+ ZB
projected in 2025 and
Growing 20%+ annually

Infrastructure Complexity

92%
of enterprises have a multi-
cloud strategy

Attacks

69%
Businesses suffered at least 1
ransomware attack last year

**Surge in Ransomware
Complexity**

1 in 4
27% of organizations paid the
ransom and never got their
data back

Complexity

Threats

Data protection and cyber resilience with ongoing attacks can be a nightmare

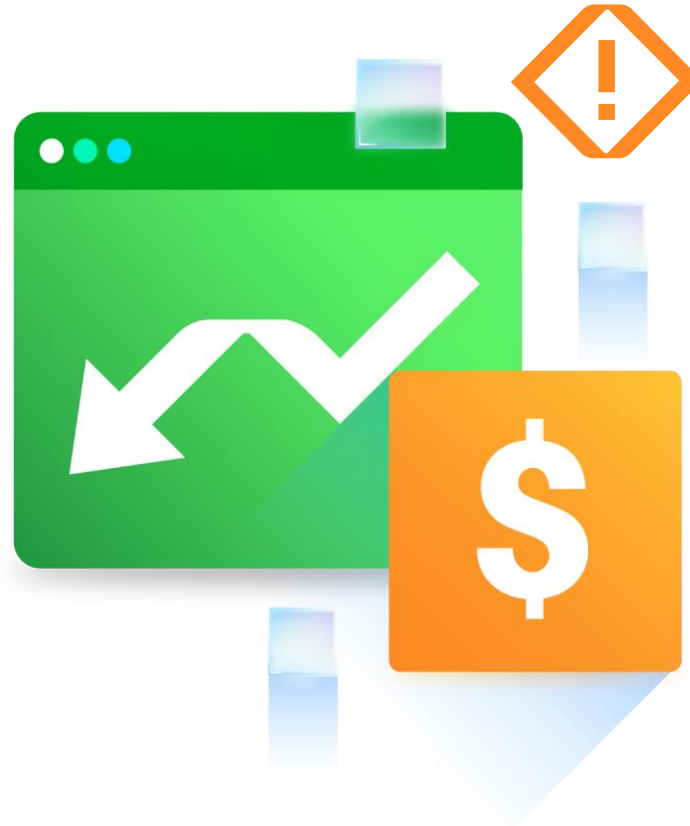

Consequences of questionable resilience

2025 Ransomware Trends

Are you prepared for the cost of outage or attack?

Global average cost of breach is over

\$4.9M

Per Incident

Organizations can suffer immense harm to their customers and their brand, with **60% of SMBs going out of business after an event.**

Veeam Data Platform

Reduce Operational Friction

Get secure backup running fast with automation that eliminates manual work.

Reduced TCO

Strengthen Security Posture

Harden systems, validate clean recovery, and contain threats with AI-powered insights.

Assured Recoverability

Freedom from Lock-in

Protect and recover anywhere, on any platform, in any cloud, without vendor traps.

Remain in Control

Walk me through your malware and ransomware Resilience strategy

How confident are you in your ability to restore your organizations data?

New Veeam Software Appliance

Veeam Software Appliance delivers secure, out-of-the-box backup - deployable VDP in minutes and easy to manage, with full flexibility to support new or existing environments.

Simple to Deploy

Eliminate headaches and remove **operational** burden with a prebuilt, ready-to-run appliance that is easy to install and manage

Secure from Day One

Compliant and Secure-by Design Architecture with automated updates that prevents misconfigurations and inconsistencies.

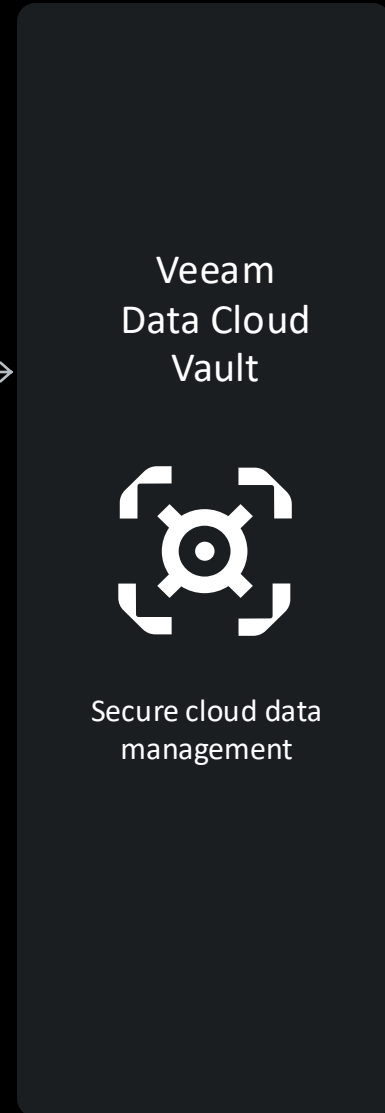

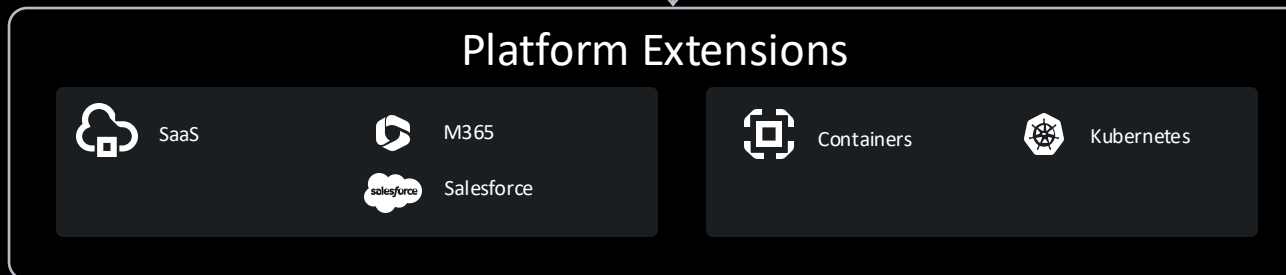

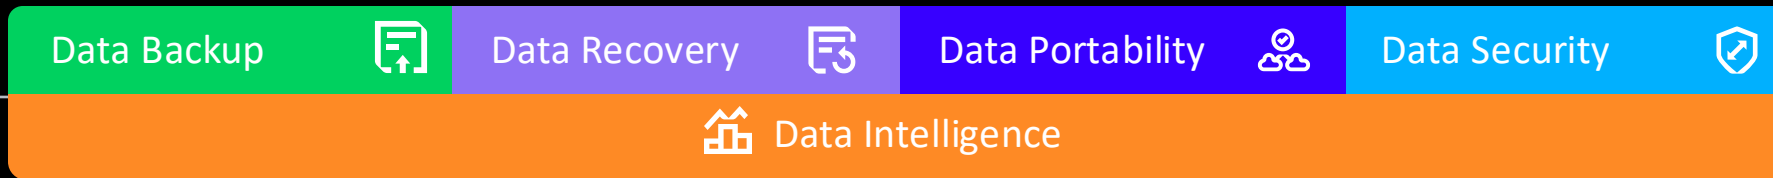

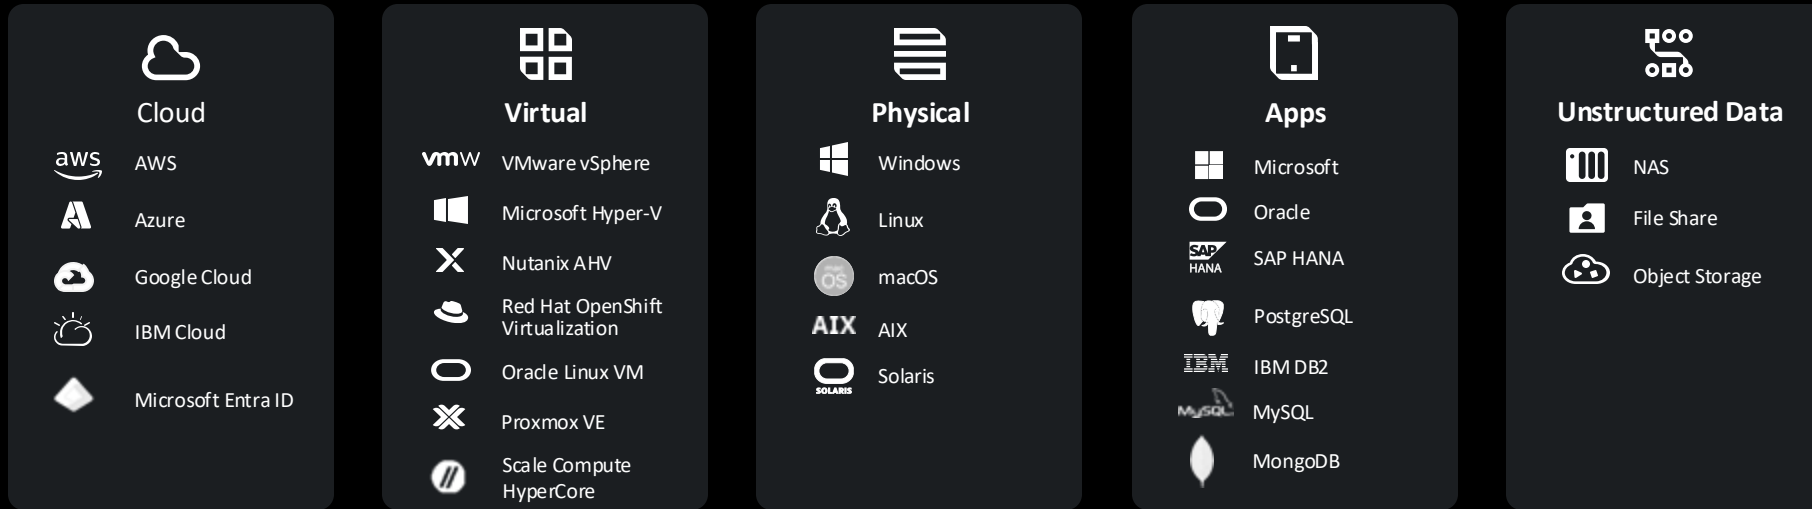

Easy to deploy, Maintain and Manage

Who is this for? **New Customers. Existing customers who want to install for New Environments. Conversion path coming for existing environments in later Q4.**

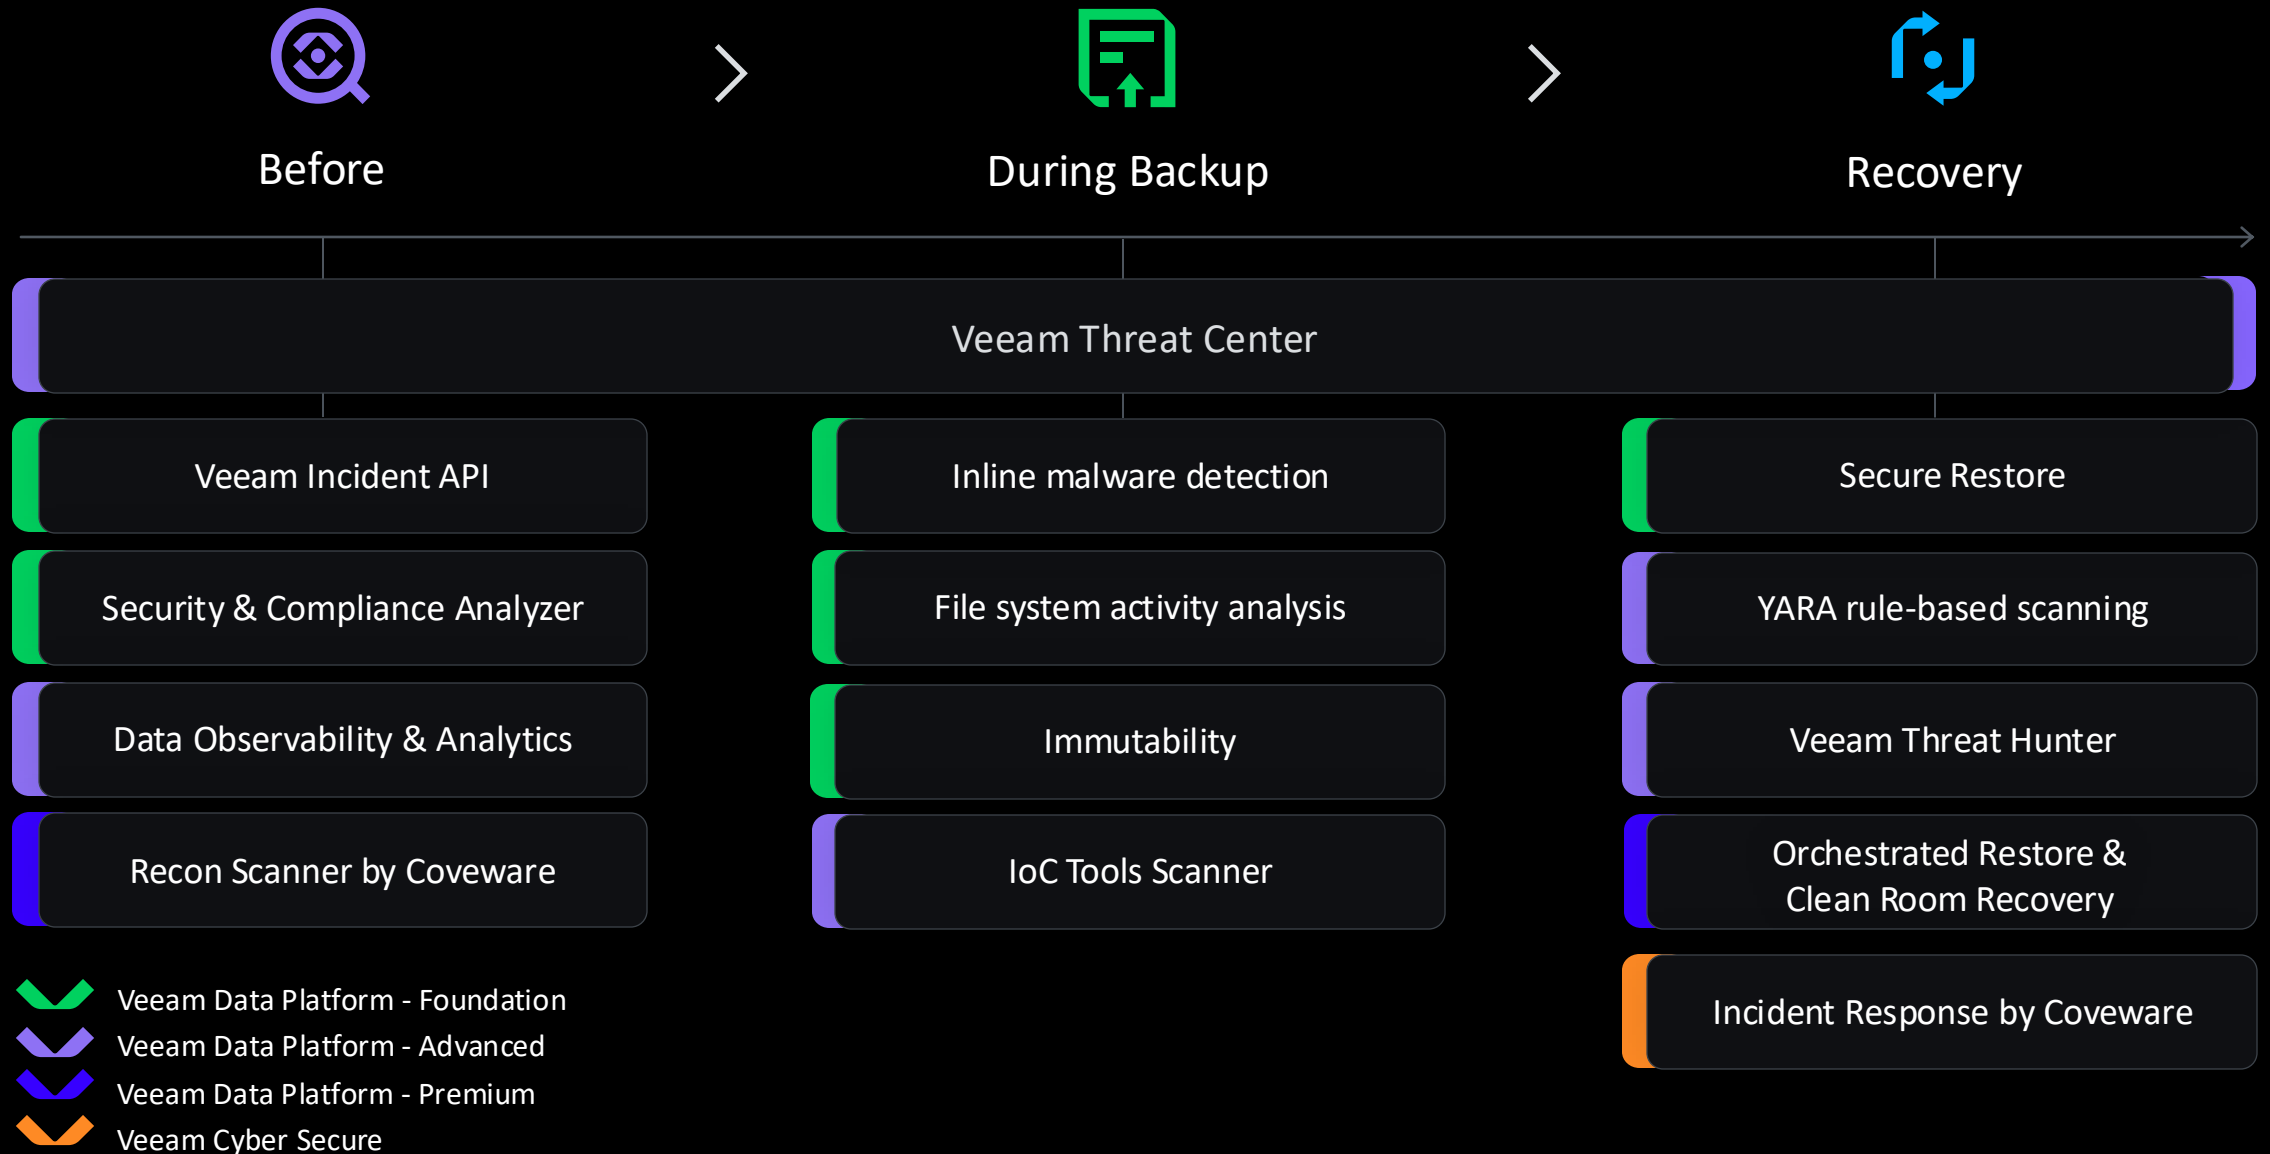

Veeam Data Platform: Single Platform to protect ALL workloads

Veeam Data Platform

Secure backup and Fast Recover • Proactive Monitoring & Analytics • Recovery Orchestration & Cyber Secure

End to End Resilience Throughout Your Data's Lifecycle

Veeam Data Cloud Vault

A fully-managed, pre-secured cloud storage resource that eliminates the headaches of managing infrastructure and unpredictable cloud cost models.

Secure object storage target built for Veeam Data Platform

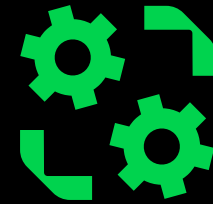

Predictable Price

Now starting at \$14/TB on two new editions

Uncompromising Security

Up to 12 nines of durability, and always immutable

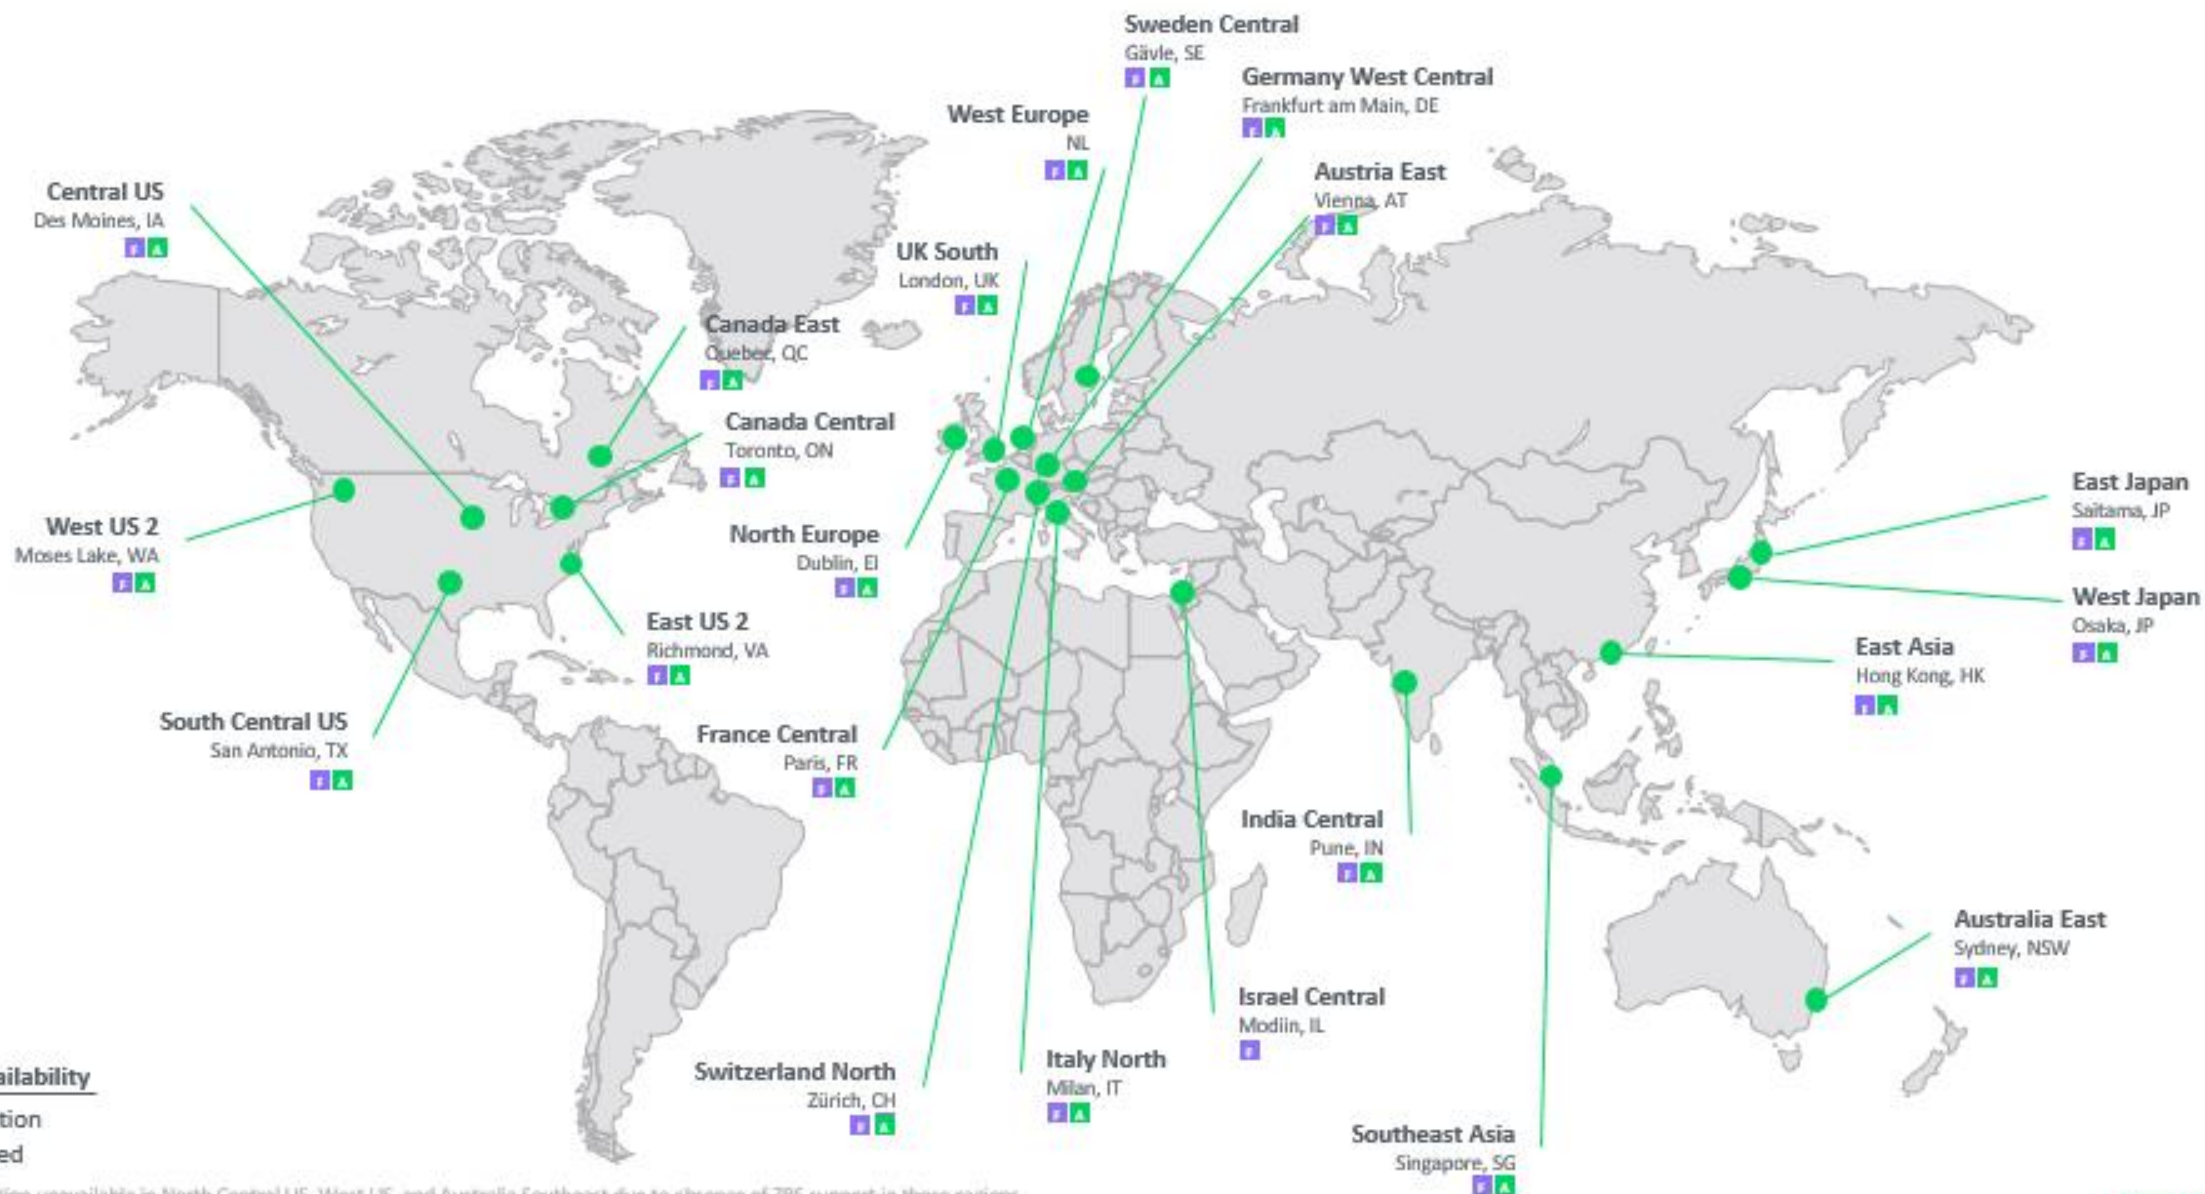

Unbelievable Ease

Fully integrated with Veeam Data Platform

Secure cloud storage made easy.

Predictable Pricing. Two powerful editions. **Built for Veeam Data Platform.**

Core Region Availability (Azure)

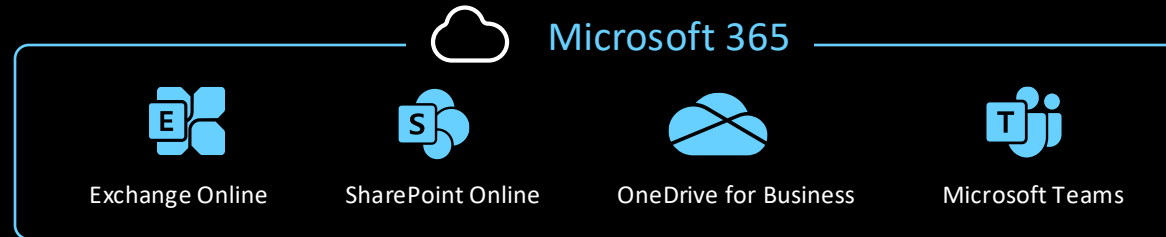

Edition Availability

- Foundation
- Advanced

Advanced Edition unavailable in North Central US, West US, and Australia Southeast due to absence of ZRS support in those regions.

Die Zukunft von Microsoft 365 Backup Storage

Die Backup-Lösung von Microsoft ist in den Backup-Service von Veeam for Microsoft 365 **integriert**. Dies bietet Kunden das Beste aus beiden Welten – Geschwindigkeit und Skalierbarkeit treffen auf Kontrolle und Flexibilität.

Veeam Data Cloud for Microsoft 365 Premium

Veeam Data Cloud for Microsoft 365

Express

Schnelles Backup des anfänglichen M365-Mandanten

Massenwiederherstellung

Wiederherstellung nach Cyberangriffen

Innerhalb der Microsoft-Sicherheitsgrenze gespeicherte Daten

Unterstützt von Microsoft 365 Backup Storage

Veeam Data Cloud for Microsoft 365

Flex

Datentrennung und Sicherheit

Flexible, granulare Wiederherstellung

Anpassbare Backups

Unterstützung von Teams

Erweiterte Suche

Exit-Strategie

Datenspeicherung am Ort Ihrer Wahl

Jedes Backup stellt eine getrennte, unabhängige Backup-Methode dar, die in die Backup-Lösung von Veeam for Microsoft 365 integriert ist.

How Veeam Does it Better

Secure by Design Architecture

Assured Recovery with threat detection and automated cleanroom recoveries

Reliable Data Portability

Ability to recover anywhere – not limited to proprietary Hyper-converged infrastructure

Software-Defined & Hardware Agnostic

Use your choice of hardware and storage or leverage Veeam's recommendations

Cost-effective and Predictable

Pay for what you use and don't be pulled into costly proprietary solutions

FROM RISK TO RESILIENCE

Veeam Data Resilience Maturity Model (DRMM)

Move from reactive to self-optimizing. A model built for resilient leaders.

GET REPORT

Best-in-Class Organizations Drive Positive Outcomes

DRMM research shows top performers are twice as likely to drive measurable impact across key resilience metrics.

7x

Faster Mean Time to Recovery (MTTR)

4x

Less Data Loss (RPO)

3x

Reduced Downtime (RTO)

2025 Ransomware Trends and Proactive Strategies

This comprehensive report highlights major trends and offers proactive strategies to enhance data resilience. Highlights include:

GET REPORT

52%

of organizations reported major improvements or overhauls in IT ops and security team communication

30%

of organizations have a pre-defined chain of command for their incident response.

20%

of organizations confidence dropped in their ransomware preparedness post-attack.

Ransomware Recovery Kit

Strengthen your defenses, reduce downtime, and improve team coordination. Get actionable strategies that help IT and security teams work better together — so you can stay ahead of ransomware threats.

Reduce risk and accelerate recovery with Veeam solutions

Veeam Data Platform Customer Stories

"One of the biggest benefits of the new appliance is the built-in security. With most of the configuration handled, I don't have to worry about missing critical steps or introducing security holes. It's a huge time-saver and gives me real peace of mind."

Scott Patterson, System Administrator at Winnipeg Police Service

"With Veeam Vault, we can quickly restore our VMs on-premises or directly to Azure — providing us the rapid recovery option that we were missing before. Crucially, Veeam offers this capability at highly competitive per-terabyte pricing"

Eric Denholtz, Sr Systems Engineer, Lamps Plus

"Veeam had our Dial-a-Ride service for residents with disabilities back online in 15 minutes rather than hours it would've taken previously. That translates into real-life impact for the residents we serve."

Jerry Simpson, CIO, City of Phoenix

"Veeam is an insurance policy that supports our mission to provide uninterrupted patient care."

Andrew Mossio, Director of Technology, University of Illinois Health

"We now have a robust and reliable data management solution in place that protects, restores and ensures the Availability of all the data our engineers need to support satellites throughout their life cycle."

Pascal Garcia, Head of Infrastructure, Airbus Defence and Space

Reasons 550,000+ organizations chose Veeam

Appliance efficiency

Operational efficiency and out of the box security without the learning curve, or high costs of proprietary hardware requirements. Pre-built and pre-configured

No Hardware Lock-in

Use the hardware that best fits your speed or budget needs, with storage agnosticism and integration with the broadest set of storage arrays and deduplication appliances. Stay secure, No Lock-in

Recoverability verified

Prove that you are ready to recover with the most sophisticated data recovery and recovery plan tests and reports. Including cleanroom recovery testing

Data portability

Move data across platforms with cross-platform recovery for the broadest set of virtual, cloud, and physical platforms.

Secure by Design

Zero trust architecture makes consistent, secure deployments the default. Improved security posture with role separation to reduce vulnerability

Orchestrated recovery

Automate complex or large-scale recoveries with sophisticated recovery plans.

Minimal data loss & downtime

Minimize RPO/RTO with CDP replication, storage snapshot, and instant recovery for the broadest set of workloads.

Unmatched threat detection

Detect more cyber threats thanks to the broadest set of threat detection methods.

Self-contained backup files

Avoid single points of failure with backup files that do not depend on external backup components.

Most granular recovery

Quickly recover application items with granular recovery for the broadest set of Enterprise applications.

In-house incident response

Get help responding to cyberattacks with Veeam's cyber incident preparedness and response team.

Predictable licensing

Keep software costs under control as data grows with front-end workload-based Universal licensing.

You've got enough on your plate, so we built a secure, ready-to-run solution that **just works**.

Simple to Deploy

- Fully pre-configured solution with “just enough” OS and Veeam software
- Flexible installation media (ISO) or Virtual Appliance (OVA)

Outcome: Be productive with the peace of mind that your data is protected sooner than you expected.

Secure from Day One

- DISA STIG hardened OS
- Automated and centralized security updates
- Tight access controls with Zero Trust operations

Outcome: Automatic updates and tight access controls keep you safe without additional work or worry.

Manage from Anywhere

- Modern, next-gen web UI
- Seamless integration with single sign-on (SAML)
- Granular RBAC for your key roles

Outcome: Freedom to work on your terms by effectively managing secure protection from anywhere.
